RE: ONLINE EDUCATION TRAINING PROVIDED BY REAL MEDICINE ENTERPRISES (RME)

Dear Real Medicine Enterprises team,

As the County Director of Education (CDE) Baringo County, Kenya, and on behalf of the Ministry of Education, I'd like to state that we fully support and endorse the training that Real Medicine Enterprises is providing in collaboration with Talai Secondary School for teachers of Talai Primary in the week of 10th May 2021.

This training will prepare Talai Primary School teachers to implement online education for their learners from grades one (1) to eight (8). It will provide the teachers with tools to navigate basic Information and Communications Technology requirements, and significantly facilitate and enhance the teachers' ability to access online education opportunities and share them with their learners.

We also envision the possibility of this training model to be replicated in many other schools of Baringo County and beyond. It could be life-changing for thousands of learners in addressing such challenges including droughts, poverty, school dropouts, and limited employment opportunities.

Partnering with Real Medicine Enterprises and having access to its trainings and platform would be a valuable tool in furthering our goals and vision to strengthen the current county's 729 schools and providing additional training to teachers, school administrators and education officials.

We look forward to seeing RME's innovative training and online platform take root and flourish in Baringo, Kenya, and beyond, and to a highly impactful partnership with Real Medicine Enterprises in this endeavour.

Sincerely,

For: COUNTY DIRECTOR OF EDUCATION
